EXPERIENCE

Lead Full-Stack Engineer

Mar. 2026 – Present

Medovent Solutions

Tampa, FL

- Own architecture, AWS infrastructure, and DevOps across a legacy CRM and a greenfield application suite.
- Assessed an inherited .NET / MS SQL / Angular CRM and produced the technical roadmap governing its security posture, ongoing maintenance, and eventual replacement.
- Implemented the technical safeguards required for HIPAA compliance in the CRM's AWS environment - encryption at rest and in transit, network segmentation, and an off-instance backup strategy.
- Upgraded a production SQL Server 2016 → 2022 database, rehearsed end to end against a network-isolated clone of production.
- Designed and shipped the first application of a new internal suite (Go, PostgreSQL, Angular) end to end - data model, API, front end, and a CloudFormation-defined AWS environment with no public ingress outside HTTPS.
- Own developer environments, CI/CD, and engineering standards ahead of onshore team growth; partner with business stakeholders to model employee workflows into the schema driving the CRM rewrite.

Software Engineer

Oct. 2025 – Feb. 2026

ByDesign Technologies

Tampa, FL

- Developed & maintained full stack applications using Angular, AngularJS, Classic ASP, .NET, C#, and MS SQL.
- Troubleshoot production bugs and delivered features across front-end and back-end systems.
- Supported CI/CD modernization to GitHub Actions and Octopus Deploy and on-premises-to-cloud migration.

System and Cloud Administrator

Jan. 2025 – Sept. 2025

Full Stack Developer

Apr. 2021 – Jan. 2025

Simple Syllabus

Tampa, FL

- Owned AWS infrastructure for a syllabus management platform serving 500+ higher-education institutions, managing RDS, ECS, EC2, Lambda, Batch, CloudFront, Step Functions, CloudWatch, and S3.
- Built the company's first CI/CD pipeline using Bitbucket Pipelines, replacing a ~2-hour manual release process with a fully automated deploy and removing hands-on engineer time from every release.
- Owned on-call and production incident response, from full outages to degraded performance.
- Developed and maintained full-stack features in TypeScript, PHP, Angular, and PostgreSQL, including RESTful and third-party API integrations.
- Optimized complex SQL queries and Angular components to reduce load times and resolve performance issues.

PROJECTS

Multi-Game Dedicated Server Manager | *TypeScript, Node.js, AWS EC2, S3*

2024 – Present

- Discord bot that provisions and controls self-hosted Palworld and Minecraft servers on EC2.
- Automated backups to S3 and held monthly running cost under \$50 via instance scheduling and right-sizing.

CERTIFICATIONS

AWS Certified Cloud Practitioner

December 2023

Credential ID: 968GCF1L5JE41457

EDUCATION

University of Tampa

Tampa, FL

Bachelor of Science in Mathematics

Aug. 2015 – May 2019

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, ECS, RDS, Lambda, S3, CloudFront, Route 53, Step Functions, CloudWatch, SSM), CloudFormation / IaC, Docker, Linux (Ubuntu, Fedora)

DevOps & CI/CD: GitHub Actions, Bitbucket Pipelines, Octopus Deploy, TeamCity, Docker Compose

Languages/Frameworks: Go, TypeScript, JavaScript, C#, .NET, PHP, Angular/AngularJS, Classic ASP

Databases: PostgreSQL, Microsoft SQL Server, DynamoDB

Tools: Bash, Git, Jira, Agile/Scrum, Postman
